EDUCATION

Rust College

Expected Graduation Date: May 2026

Bachelor of Science in Computer Science, Minor in Business Administration

GPA: 4.0/4.0

Honors/Awards: E.A. Smith Honors Scholar, President's List Spring 2025, NAACP Marcus Garvey Image Awardee (National Association for the Advancement of Colored People)

Relevant coursework: Intro to Software Engineering, Intro to Web Development, C++ Programming Language, Calculus I, Programming Languages Design, Data Structures & Algorithms

SKILLS

Languages: Python, C++, C#, JavaScript, HTML, and CSS

Frameworks & Libraries: React, Node.js, Express, Flask, Chart.js

Databases & Tools: PostgreSQL, Prisma, Git, GitHub, Visual Studio Code, Visual Studio

EXPERIENCE

Software Engineer Intern, Microsoft - Redmond, WA

May 2025 - August 2025

- Architected reusable components used across millions of Bing search result pages with full accessibility support under the Bing Multimedia team, improving consistency and user experience across search results.
- Collaborated closely with design and product teams to ensure seamless integration and high-quality implementation using C#, HTML, and CSS.

Software Engineering Fellow, Netflix x Formation - Remote

May 2025 - October 2025

- Selected as 1 of 40 students from 1,200+ applicants for the competitive Netflix x Formation Program, a technical accelerator focused on data structures, algorithms, and system design, developed in collaboration with Netflix engineers.

Software Engineer Intern, Meta - Menlo Park, CA

June 2024 - August 2024

- Developed [BusinessConnect](#), a full-stack web application connecting users with local businesses, enhancing discoverability and engagement through an intuitive, map-based search interface.
- Delivered personalized recommendations with a machine learning system to improve user relevance and satisfaction. Collaborated across the stack using React, Node.js, and Prisma to ensure maintainability and scalability.

PROJECTS

[Flixster](#)

- Developed a responsive movie app using HTML, CSS, JavaScript, and React, integrating features like movie display, search functionality, detailed popups, and sorting options with data from The Movie Database API. Implemented accessibility features, including stretch features like embedded movie trailers, a 'watched' checkbox, and a favorite button.
- Deployed on Render with zero downtime and mobile-first design, achieving <1s load times on average.

[Music Playlist Explorer](#)

- Implemented a dynamic playlist display using JavaScript to fetch data from a JSON file, creating interactive tiles on the homepage that show cover image, name, creator, and like count.
- Added functionalities including a detailed modal view with song information, a like button with real-time updates, and a shuffle button to rearrange songs within a playlist.

[Mutual Fund Calculator](#)

- Collaborated with a team to design and develop a dynamic investment calculator web application using React, Chart.js, and Flask, featuring real-time API integration, interactive data visualizations, and responsive UI for analyzing mutual fund performance over time.
- Enabled users to analyze 10+ mutual fund performance trends over time with responsive UI and data filtering.

LEADERSHIP

President, Google Developer Group - Rust College,

August 2024 - Present

- Led the Google Developer Group on campus, organizing workshops, hackathons, and networking events to empower students in software development and foster a collaborative tech community, resulting in increased participation and engagement among peers.

Sophomore Class President, Student Government Association,

August 2024 - April 2025

- Championed initiatives to enhance student engagement by organizing events, facilitating communication, and collaborating with faculty to address student concerns, resulting in improved class unity and increased participation in campus activities.
- Actively listened to student feedback and concerns from the Sophomore Class of over 100 students, implementing improvements based on their input to tailor class initiatives and activities to meet student needs better.

President/Founder, Girls Who Code College Loop,

August 2023 - Present

- Led and coordinated activities for the college chapter of Girls Who Code, promoting computer science education and empowering women in technology.

ORGANIZATIONS

- Girls Who Code, Rewriting the Code, ColorStack, CodePath, United College Negro Fund
